

# tesa® Professional 60077 PE Sealing Flex Plus Tape

## Product Information

tesa® 60077 PE Sealing Flex Plus Tape

### Product Description

The flexible PE sealing tape tesa® 60077 with its particular adhesive strength is ideally suited for airtight seals of overlapping vapor barrier foils. The vapor barrier tape helps efficiently protect buildings from humidity that might enter through the roof. For sealing wall penetrations, e.g., when laying pipes and cables, the sealing tape is a reliable helper. Due to its flexible backing, the fibers inside and a width of 50mm, application is easy and fast. Its high age resistance allows the sealing adhesive tape to be used in challenging environments as well. Furthermore, the sealing tape has very low emissions (GEV-EMICODE certificate).

### Application Fields

- Flexible, PE-based sealing tape
- Protects buildings against humidity through airtight sealing of vapor barrier foils (according to (gem. DIN 4108-11)
- Vapor barrier tape for new buildings and renovations of existing roofs
- Indoor and outdoor application (according to P-mark certificate): insulation under, between or over the rafters
- Sealing adhesive tape also suited to seal wall penetrations when laying pipes and cables
- Extremely high and permanent adhesive strength
- Easy and time-saving application
